W/C 15/06/2020: Space

Year 2

Weekly Reading Tasks	Weekly Phonics Tasks
Monday- Ask your child to select a book and imagine they are reading it in space. Try reading it with a flashlight just before bedtime.	Monday- The word 'space' contains the sound 'a-e'. Ask your child to list as many words as they can containing the 'a-e' sound. Your child might identify words that contain an alternative spelling for 'a-e' such as ai/ay/a .
Tuesday- Ask your child to listen to Look Up! read by the author and then take part in a drawing session with the book's illustrator.	Tuesday- 'there', 'move', 'climb', 'fast' and 'behind' are some of the words that children in KS1 need to be able to spell. Can your child use these to write sentences about a rocket travelling into space?
Wednesday- Take a look at these facts about space and read them together. Planets on Oxford Owl has further facts. Does your child have any further questions about space that you could investigate?	Wednesday- Look at the words: want, wash, wasp, wand, swallow, squash, swap, squad, swamp, watch . Ask your children to sound talk the words and identify how the letter a should be pronounced in each of these words (/o/). Explain that when /w/ comes before vowels it can affect the pronunciation of the vowel.
Thursday- Ask your child to list any space related words from the books they have read or listened to this week. Can they write the meanings of each word?	Thursday- Write the names of the planets on separate pieces of paper and practise reading them. Can your child order them alphabetically?
Friday- Listen to Beegu here . Can your child write a character description about Beegu? Encourage them to reference events from the story.	Friday- Play the online game ' Yes/No Yeti ' or the ' Suffix Factory '. Can your child list words that end in the suffixes: ing, ed, ly, ful, er, less, ness, ment?

Weekly Writing Tasks	Weekly Maths Tasks
Monday- Ask your child to design their own rocket and create a bank of adjectives to describe it and verbs to describe how it moves.	Monday- White Rose Maths activity – Properties of 2D shapes
Tuesday- Now that they have designed their rocket, ask your child to create an advertisement of the rocket launch. How much will it cost? What time will it launch? Is there anything else on offer?	Tuesday- White Rose Maths activity – Properties of 3D shapes
Wednesday- Ask your child to plan their own trip to space – what will they take and what will they do there? Record this in a timetable.	Wednesday- White Rose Maths activity – Sorting shapes
Thursday- Encourage your child to research facts about a planet and then create a fact file about their chosen planet. For example, Earth, Jupiter, Saturn etc.	Thursday- White Rose Maths activity – Shape patterns
Friday- Watch the Disney short “La Luna” here . Ask your child to write a short diary entry about the star crashing into the moon.	Friday (theme)- Use this day to consolidate the week’s learning and to practise times tables using some of the links below.

Learning Project - to be done throughout the week

The project this week aims to provide opportunities for your child to learn more about space. Learning may focus on our Solar System, the Sun and the Moon. It could look at life in outer space from the view of an astronaut and travelling through space.

- **Our Solar System-** Encourage your child to think about what they already know about space and create a mind map. Can they name the planets in our solar system? Use [the Solar System Song](#) to create a diagram showing the order of the planets. Or make real ones using balloons and paper mache.
- **Astronaut Aerobics-** Astronauts have to be fit and agile for their missions into space. Ask your child to design a home workout and put your agility to the test! You could even use [Mr Garcia's](#) video to help. Then, your child can plan a day of healthy eating for the aspiring astronauts thinking carefully about each food group.
- **What are Day and Night?-** Share the video of [day and night](#) with your child. Watch the video and then create a poster about day and night explaining why we have day and night. Play the quiz and see how many answers you can get right!
- **Rocket Creation-** As part of their writing tasks, your child has designed a rocket. Ask your child to create their rocket using objects they can find in the home such as cardboard boxes, newspapers and tin foil. Can they write a set of instructions of how to make your rocket to share with a family member or friend? Share on Twitter at [#TheLearningProjects](#).
- **Is There Anything out There?-** [Tim Peake](#) is a famous British astronaut. Ask your child to record the questions they would ask him if they could interview him. Can they answer the questions in role as him? Why not task them with designing a new space suit for him? What would make a good space suit?

STEM Learning Opportunities

Mission X – Astro Food

- Collect a variety of plant foods from home or download the cards from [this](#) resource.
- Group the food/cards e.g. fruits, seeds, vegetables. Which parts are edible?
- Sign up and access all of the Mission X resources [here](#).

Additional learning resources parents may wish to engage with

- Further activities at [Nasa for Kids](#).
- [White Rose Maths](#) online maths lessons. Watch a lesson video and complete the worksheet (can be downloaded and completed digitally).
- [Numbots/TTrockstar](#). Your child can access this programme with their school login.
- IXL- Click here for [Year 1](#) or here for [Year 2](#) . There are interactive games to play and guides for parents.
- [Mastery Mathematics Learning Packs](#) Learning packs with different activities and lessons. Includes notes on how to do these activities with your children.
- [Y1 Talk for Writing Home-school Booklets](#) and [Y2](#) are an excellent resource to support your child's speaking and listening, reading and writing skills.
- [Education city](#)
- [Oak National Academy](#)

The Learning Projects are based on the **National Curriculum expectations** for the key stage which your child is in. It may be that your child finds the tasks set within the Learning Project for their year group too simple. If this is the case, then we suggest that your child accesses the Learning Projects which are set for the key stage above. Equally, if the projects are too challenging, then we advise that your child accesses the projects for the key stage below.

If your child requires more of a challenge, or you believe that there are some gaps in their learning then [Century Tech](#) is a fantastic resource that is currently free for home learning. The app is designed to address gaps and misconceptions, provide challenge and enables children to retain new knowledge. It uses artificial intelligence to tailor the learning to your child's needs. Sign up [here](#).
